

Hi Everyone,

Hope everyone is doing well. I'm doing OK!

Our second Zoom meeting was held on May 6th with about 15 members present. Mike McCabe hosted the meeting, thanks Mike for coordinating it. Again, it's a great way to connect with our club members!

Here are the highlights:

- Through the month of April, members shared their observations through an e-mail. These shared e-mails were reviewed at the start of the meeting.
- Mike and Louis conducted two Zoom meetings to the Moon. This was a live screen lunar viewing session.
- Mike reviewed the observing list for May including the comets which are still visible in the sky.
- Featured presentation. Carl Bellitti gave a great lecture on electronically assisted astronomy or EAA. This included astrophotography, the pros and cons, equipment and software needed, and his own personal experiences using this method.
- Group observing sessions and lighthouse outreach are still cancelled for the time being.
- There may be a possibility of having Astronomy Day on September 26th.
- Don't forget to check out Barry's article entitled, "What's Up" seen on our website.
- Lastly, Mike presented the door prize (book entitled Universe in a Mirror) to Hal Schaefer.
- There was an informal discussion of viewing places on the South Shore and Cape.

Our next meeting will be a Zoom meeting held on June 3rd. See you all then. Enjoy the month of May!

Best,  
Judy Macioci
