

Hello Everyone!

Hope you are enjoying this lovely weather and trying to be outdoors as much as possible as we head into phase two of a new normal.

Here are the minutes of the June meeting...

- Mike opened the Zoom meeting with about 16 members present. It looked like we had some new faces joining us for the evening! Welcome!
- Through the month of May, members again shared their astronomical observations and images through an e-mail and remote pictures. Spectacular images everyone!! These were reviewed at the beginning of the meeting.
- Mike discussed a creative way to conduct outreach during the pandemic by setting up his TV and scope and letting folks observe in this manner while keeping social distancing. Hope we try this very soon!
- July will be a Zoom meeting. Maybe...by August the library will be open for a group meeting. Fingers crossed!!
- Louis sent out an e-mail with info regarding an August star party at a campground in Vermont. As most of you know, Stellafane was cancelled and this would be a great way for members to meet and observe the deep dark sky. As Louis said, "there's a lot of sky up there." Please see his email for details, place, time, etc.
- The group talked about Ellisville Harbor State Park for a possible viewing spot.
- The big door prize, a book entitled " 50 Things To See With a Small Telescope" was awarded to Don Greeley.

Have a great month everyone, hope to see you at a live meeting in August!

Best
Judy Macioci
