

Hi Everyone,

Hope you are enjoyed this lovely day.

- Mike McCabe started the September 2nd virtual meeting with 22 members and friends present.
- If you did not attend this Zoom meeting you missed a lively one! Lots of energy and sharing of astronomical ideas, events and stories.
- The star party at Hazen's Notch was a huge success. Mike shared photos taken by members during the weekend and Louis and other members shared their experiences. It sounded like a great time and we are all invited to go back next year!
- Mike also gave a brief review of the August objectives.
- Some members met at Ellisville Harbor State Park to observe the night sky. This area may become a potential site for observations for the club on a regular basis.
- Mike discussed observing objectives for September. Lots of planets in the sky this month.
- Mike suggested we all engage in an observation challenge studying and charting the moons of Jupiter. Did anyone accept the challenge??
- Going forward, we are hopeful for some in person observation sessions. For now, the meetings will be virtual unless we can try to meet at the field for our October meeting, weather permitting.
- Mike raffled off the book entitled, Cosmic Tourist, by Brian May. One member begged and begged for the book. Mike relented. Without mentioning names, "she"... was very, very happy!!

Have a great weekend,

Hope to see you in person soon...

Judy
